2017 CLASS DATES:
Monday, February 13, 2017
Monday, May 1, 2017
Monday, September 11, 2017
Monday, November 13, 2017

PURPOSE
This workshop is designed to provide basic information for obstetrical nurses on the use of fetal monitoring in the care of patients. Discussion will include methods of fetal monitoring, recognition of changes and interventions to assist in the management of patients. Documentation issues and methods of antepartum testing will be included.

OBJECTIVES
1. Discuss external and internal methods of monitoring fetal heart rate and uterine activity.
2. Identify characteristics of fetal heart rate baseline and periodic & episodic changes using NICHD terminology.
3. Interpret fetal heart rate patterns and the interventions needed to manage these patterns.
4. Review fetal heart rate patterns & uterine activity and discuss appropriate assessments and interventions.
5. Discuss documentation of electronic fetal monitoring.
6. Describe methods of antepartum testing for the evaluation of fetal well-being.
